Your essay should include the influence of heavy traffic and measures to be taken to reduce heavy traffic. You should write at least 120 words but no more than 180 words.

参考范文

### On How to Reduce Heavy Traffic

---

Nowadays with the increasing number of private cars, traffic has become from bad to worse. There are often traffic jams on the road, especially during the peak hours. Such heavy traffic has caused great damage to the environment.

Measures should be taken to reduce it. For one thing, the government should encourage citizens to reduce the use of private cars. For example, the authorities concerned can make public transportation more available by lowering fees, adding more public vehicles and opening up more lines. If public transportation is more convenient, citizens will choose it instead of private cars. For another, citizens should realize the grave consequences caused by heavy traffic and go to work by bike if they don't like public transportation as bike-sharing has existed in many cities, which makes cycling easier.

Since exhaust fumes are one of the causes of many environmental problems, such as the greenhouse effect and smog, all citizens should take more efforts to lessen the heavy traffic and to reduce emissions of exhaust fumes for the sustainable development of the environment.

#### **On Post-holiday Syndrome**

Have you ever had a feeling of depression caused by fatigue, loss of appetite and irritability upon returning to school or working from holidays? If so, don't panic; you just suffer from the so-called post-holiday syndrome, a catchword which has caught our attention in recent years. As can be told from its symptoms, the syndrome has negative impacts on our life, work, study and health.

There are two main reasons accounting for post-holiday syndrome. To begin with,

---

tracing the syndrome to its source, it is usually caused by irregular lifestyles and overindulgence in the holiday. Furthermore, psychologically speaking, we find it extremely hard to readjust ourselves to the regular schedule after throwing us into thoroughly relaxed lifestyle.

So what can we do to avoid post-holiday syndrome? In my opinion, the most effective way to nip the syndrome in the bud is to keep the same lifestyle during the holiday. Another approach to keep post-holiday syndrome at bay is to retain an optimistic and positive frame of mind, which can help us to stay away from negative moods.

#### Topic 5 赞美

**Directions:** For this part, you are allowed 30 minutes to write a short essay entitled *The Importance of Compliments* by commenting on Mark Twain's remark "I can live for two months on a good compliment." You should write at least 120 words but no more than 180 words.

参考范文

#### The Importance of Compliments

Just as the words Mark Twain even remarked, "I can live for two months on a good compliment." What he said implies that a compliment is a necessity in our daily life.

As far as I am concerned, compliments are essential to our life for the following three reasons. Firstly, compliments from others boost our confidence and explore our potential. Here is a story to illustrate this point. A child was often scorned by others because he was slow in study. However, his mother never gave him up and always paid him compliments. Little by little, he built up confidence and finally entered a famous university. Secondly, compliments in our daily life bring harmony and happiness to us. What's more, the significance of compliments has also been proved by psychological studies, which support that a compliment is to the soul what water is

to the body.

In summary, good compliments can help us win others' trust and improve our life. So be generous to give your whole-hearted compliments to the people around you!

## Topic 6 勇于尝试

参考范文

### Never Stop Trying

“A life spent making mistakes is not only more honorable, but more useful than a life spent doing nothing.” Such is the remark made by Bernard Shaw, a great playwright. This view is shared now by more and more people.

As young people, we are confronted with so many opportunities and challenges nowadays. All that we can do is to seize every opportunity to do what we want and achieve our goals, rather than wander through life. There is a saying going like this, “Taking a beautiful fall is better than wandering aimlessly.” Thinking something over a thousand times is not as effective as actually doing it just now. Take starting our own business as an example. It often involves risks and entails hard work and determination. Only when we are willing to take risks and go all out can we accomplish great things. Even if the business does not work out at the end, we can learn valuable experience and lessons from the failure.

To conclude, failure indicates that we are actually doing something instead of just sitting in our comfort zone. So, never hang back and go for what you want.

No one can imagine what our life would be like if we ran out of water. Many people ignore the fact that they waste a lot of water in their daily life. For example, people tend to do something else while the tap is still on or even forget to turn off the tap after using it.

Not until recently did people realize the serious water shortage. It is universally acknowledged that severe water pollution and waste result in water shortage. Therefore, it is high time that the public raised their awareness of saving water resources. In my opinion, we must take effective measures to deal with this problem. For one thing, population should be controlled and more sewage treatment facilities should be established to purify the polluted water. ## The Key to Becoming a Talented Person

Different people hold quite different opinions about the key to becoming a talented person. Many people assert that personal abilities count for much. They maintain such an idea because a lot of people stand out in their peers for their remarkable capacities. However, others believe that opportunities play a vital role in one's success, which helps to explain why some people become prominent while others similarly talented are left behind.

As far as I'm concerned, the internal capabilities are much more important than external opportunities for a person to become talented. First, there are various chances in our society but only those who are adequately prepared can make good use of them to achieve their goals. Second, without a ready mind, golden opportunities may slip through one's fingers. Last but not least, no matter whether there are favorable opportunities or not, what we should do is learn and improve ourselves constantly.

In a word, we can take advantage of opportunities to achieve success but never can they be a precondition for success. Comparatively speaking, personal abilities are more important for a person to become talented.

### Computer Crime

With the rapid development of modern telecommunications networks in China,

---

computer crime has become an alarmingly serious social problem. As a result, it has aroused nationwide concern.

Ranging from computer fraud to copyright infringement and passwords snatching, computer crimes pose a grave threat to the national security and individuals' safety and privacy. They have held back, to a large extent, the healthy development of the Internet. Briefly speaking, illegal conducts online have affected the normal order of all aspects of society.

But how can we eliminate computer crimes? First of all, it is urgent for the government to strengthen administrative supervision and introduce strict regulations. Secondly, with soaring cases of computer crimes, it is of great significance to study them and enhance preventive measures.
